# Car Parking Tensile

- We provide standard car parking shades, most of which include the option of barrel and cantilever vault.
- The car parking tensile structures are constructed using different materials like cotton canvas, nylon, and polyurethane, to name a few. All the tensile structures manufactured by us are durable and are known for their excellent features.
- A leading provider of various kinds of/ tensile shades, our product range includes and is not limited to car parking shades, modern parking shades, single and double bay car parking sheds, cantilever car parking shades, free-standing parking shades, and more.
- We design, manufacture, and build prime quality tensile structures, including canopies, event structures, parking shades, gazebo tensile structures, pagoda tents, walkway tensile structures, courtyard tensile structures, amphitheater shade structures.

# Awnings

- Outdoor awnings act as a supplemental covering to a pre-existing roof, providing shade on a sunny day and protection during rainstorms.
- Start your free trial Consider your plans for using your outdoor space before investing in the right cover, such as automatic blinds that allow you to control the temperature and heat more easily.
- An awning can enhance your outdoor space significantly, while also offering practical benefits to you, your family, and your guests.
- Door awnings can be ideal for keeping your welcome mat dry and preventing slippage at entrances, while window awnings make for spectacular accents for your window.

# Fix Frames

- Our range of Fix Frame Awning | Terrace Awning in Pune | Tensile Membrane is widely used for covering spaces like terraces, shop fronts, and commercial waiting areas.
- The framework is made of painted steel tubes and a painted circular grid of metal is fabricated on the frame and the fabric is stitched to the desired dimensions and fixed on the frame using nylon cord. These are available in different shades and patterns.

# Conical Tensile

- We engaged in the manufacturing of high quality Tensile Structure In pune | Conical Tensile Structure. Our unique designs, stringent quality check at each stage of production and timely delivery within stipulated time frame have made us a disputed choice of our customers. It has very high tensile strength and elasticity to bear extremities of temperature and weather conditions.
- We use the best quality steel and continually discover ways to better utilize the material and use its strengths at optimum levels. Our valuable clients can rest assured that our commitment is evident in the excellence of our products. Customization is also provided to the customers and available in bulk as well.

# Canopy

- A canopy is a structure that provides shade to an outdoor area. It is freestanding and is not attached to a building or structure. A canopy can be a permanent pergola or gazebo style structure shading patio furniture. They can even have motorized or manual retractable parts that adjust for protection from the sun or precipitation.
- Alternatively, it can be a portable, pop-up affair that can be transported to a beach or sports field to shade people and furniture. They can provide shade to small areas, or can be large enough to shelter a full wedding dinner and dance area. Like awnings, they can have motorized or manually operated components.

# Retractable Awning

- We take pleasure in introducing ourselves as leading firm by offering Outdoor Window Awning. The lightweight and strong weather resistance are two important features. It's been highly used for your balcony, window, backyards and so on. And it is easy to install.
- Our company is offering a wide range of terrace awnings & Retractable Awnings in Pune, which is used to give the terrace a beautiful and elegant look as well as to protect from the scorching sunlight. These motorized retractable awnings are easy to install and assemble and are renowned for high end features such as water proof.

# Gazebo Tensile Structure

- Our company has gained name and fame in presenting Outdoor Gazebo Tensile Structure.
- Feature:
  - Flame Retardancy and Anti Ultraviolet Waterproof and Corrosion Resistance
